

Working session in Brussels

Alte Cgl.

D → saw Gov. De Coker, were satisfied, but Pöhl

looks in importance to Commission, but helps them along;

Pöhl's paper → writing whether need to others?

For Pöhl:

• he got to discuss the C without pre-prepare their position;
how do we lead them? Outcome necessary, like membership;

is can do more?

At the end of the process each member must express what is
achievable + possible!

Our paper → began with definition, not end objectives
with EMU, fiscal policy, farm up, through central bank

↓
M.V. article action;

but for EMU, CR not enough;

former than 2 elements to

- : what is political possible
on the policy making
- : since 3 great a political
Committee and cooperation;
all the way to dimension social

Reflection

Gov. can proceed to more complex;

task 1 x check at with coordination of policies → is it necessary or not?

What is its role,

is are its means to fulfil the role

what are its objectives?

shape of centralization, of federation

task 4 for monetary policy

same questions role, means, objectives.

for this → a number of questions, not too many;

no dilemma to be solved;

By questions of management re + monetary policy →

1) how to do it.

four elements of future plan of report

1) should there be a number of central reports
why (needed?)

2) What is the scheme of the ECU, show the problems

3) What can be done for the benefit of
Community

4) Propose a list of steps (cannot make it more
operational for

he would

she wants / the ECU definition, in the light of the Brussels package

Practical implementation

problems

EU definition

↓

its implementation to implement

→ structural funds } have been approved until 92; D wants
budget platform } to open the discussion

on the way to EMU

3 steps → WR → mainly macro-ec, in a firm-banking manner

new → approach to int market, macro-ec. etc. financial
mechanism; emphasis of market forces

→ structural funds, better cooperation, (Brussels package)

↓

should help to dist market forces

Brussels package → type of political will, ^{even if governments will} macro-economic package; difficult to measure;

Review paper

of areas covered by C. is engineering, social, technological, educational

17 - show political depth

to disorganize

the change that will lead to harmonization but only on its characteristics

don't want open to

proceeds to put to ECU

more unbalanced arrangements

note before a position →

Context in which the discussion takes place

1) signed note → to recall the commitments made by Europ. Council; remove physical barriers

note → to draw a border line between ECU necessarily defined as a framework contract or a method of definition

of criteria & restrictions

to place the

remain the same at the national level + at the Gov. level
