---

Market Update

2<sup>nd</sup> December 2021

## WHAT HAPPENED SINCE SEPTEMBER?

- **September/October:** Evergrande worries, Commodity price shock, some CB hikes, ECB Oct meeting
- **November:** BoE decision disappointed, Fed moves ahead, 4th wave in full swing, ECB securities lending limit increase, GE finalises coalition agreement, new variant fear

# OUTRIGHT AND CURVE MOVES

# THE ISSUER PERSPECTIVE: FUNDING PROGRESS

Funding Progress YtD – Supply selected Issuers

- Funding mostly done
- Frontloading
- No summer break
- Supply adjustments

# THE ISSUER PERSPECTIVE: SHORT END

## ESM 3M Bills

Source: Bloomberg, ESM

## DISCUSSION POINTS:

---

1. Announcement of the ECB securities lending limit (cash vs collateral)

Eurosystem increased the limit of the securities lending facility by €75 billion to €150 billion

Past limits not utilised. Why?

2. Powell statement caused a flattening of UST, what are the spillover effects to the Euro market?

3. What is excess liquidity doing to secondary bond markets?
