Executive Summary

Timely implementation of ISO20022 considered as the main challenge in the Austrian market

Some of the reporting entities responded to the survey. This section presents the actual situation of the Austrian market regarding the implementation of the SCORE standards. Austrian banks see and agree on the need for the implementation of the standards but there is an issue of concern in the view of the time schedule for the ISO 20022 implementation. This implementation is regarded as the main challenge in complying with these standards. Currently the aftermath of the pandemic crisis and the implementation of regulatory requirements (SRD, SFTR, CSDR) supported by legal acts and with close mandatory deadlines are crucial and in the main focus of the Austrian market which means that relevant resources are still tied up.

CSD – OeKB CSD GmbH

CSD will meet future milestones

According to the results of the survey OeKB CSD's implementation plan is on track and future milestones will be met.

Custodians

Implementation status of Austrian custodians still diverse

Some Custodians in the Austrian market have already implemented several standards or are well on the way to implement them. Others have reported that they haven't started their internal analysis yet but are planning to do so in due course.

Issuers

Austrian Issuers also concerned about ISO20022 adaptation plan

The main Austrian issuers are aware of the obligations under the AMI-SeCo standards. Some Issuers in the Austrian market have several standards already implemented but have concerns about the ISO-20022 adaptation.

NCB

Oesterreichische Nationalbank will adopt AMI-SeCo standards for CA in accordance with the Austrian market

For the comprehensive adoption of the AMI-SeCo standards for Corporate Actions, Oesterreichische Nationalbank sees strong dependencies on the progress of the relevant markets per se. Naturally OeNB is committed to take a catalyst function to promote the implementation of these AMI-SeCo standards beyond the first wave.

SCoREBOARD

This section presents the overall compliance status in the market. CSDs and TPAs are monitored on an individual basis and are assigned a colour-code status in accordance with the methodology outlined in Box 1¹. Custodians and Issuers are monitored on an aggregated basis and assigned a percentage compliance status.

Box 1

SCoREBOARD – Implementation Phase

- The Standard has been implemented
- Implementation of the Standard is on schedule (based on the agreed milestones)
- Implementation is behind schedule (based on the agreed milestones)
- Implementation has not started

For custodians and issuers, progress is monitored and reported as a percentage; for example the % of custodians in a given market who have started internal adaptation of IT systems.

Notes:

- For CSDs and TPAs the colour-code reflects the current implementation status of each Standard in accordance with the methodology outlined in Box 1 above.
- TPAs are using custody services provided by CSDs or Custodians in order to disseminate CA information to Collateral Givers and Collateral Takers. Monitoring of TPAs thus focuses on the implementation of triparty specific workflows described in Standard 1.
- For custodians the % indicates that the standard has either already been implemented, or that implementation is on track i.e. at a minimum that analysis has already started or that implementation has started per Standard.
- Issuers were asked to confirm awareness of their obligation to provide all relevant information to the Issuer CSD (on a Yes/No basis). The % reflects the number of issuers who responded yes to the survey
- Percentages are calculated on the basis of expected respondents, i.e. number of entities monitored in the market.
- A plausibility check was performed by the CMH-TF secretariat.

Milestones expected to be achieved in the current reporting period are highlighted in blue in the header of Table B below. The blue colour-code is then assigned to those milestones which have been successfully achieved to date for each respective entity. Milestones which will only be achieved later are assigned a yellow status, while milestones which will only be achieved with significant delays / where work has not yet commenced are marked in red.

For the remaining milestones (i.e. milestones due to be achieved only after the current reporting cycle) the colour-code indicates an entity's expected ability to achieve a future milestone on time. The expected date of achievement is also indicated in the table if it is different to the milestone date defined by AMI-SeCo.

Summary

Austrian banks see and agree on the need for the implementation of the standards but there is an issue of concern in the view of the time schedule for the ISO 2022 implementation, which is regarded the main challenge for compliance.

The aftermath of COVID-19 and the implementation of regulatory requirements (SRD, SFTR, CSDR) supported by legal acts and with close mandatory deadlines are crucial and in the main focus of the Austrian market participants which means that relevant resources are still tied up.

As some market participants have not started their internal analysis yet, consequently the more recent milestones (i.e. milestones 2 and 3) have not been met either.
