

# **Corporate Actions Adaptation Plan** KDPW

Activity	Corporate Actions
Plan submitted by	KDPW
NSG	AMI-SeCo NSG_PL (Poland)
Date	June 2021

### Background

The Adaptation Plan provides information on the changes which will be implemented to meet the AMI-SeCo Standards for Corporate Actions which form part of the Single Collateral Management Rulebook for Europe (SCoRE). Full details of the Corporate Actions Standards can be found on the ECB website.

The document is structured as follows: Section 1 (Cover Letter) provides a highlevel summary of the changes in order to implement the AMI-SeCo Standards. Section 2 (Adaptation Plan Table) then provides a more detailed overview per Standard covering a feasibility assessment and the implementation milestones.

#### Cover Letter

1

KDPW fully supports the introduction of collateral management harmonisation standards endorsed by AMI-SeCo. We have performed a high level analysis of our current compliance with the Corporate Actions standards in order to identify areas where further harmonisation and standards adaptation would be required, as well as to pinpoint issues where legal barriers could interfere with the adaptation and full implementation of CA standards.

The below adaptation plan outlines current state of the CA processes within KDPW system used by KDPW CSD participants. KDPW already complies with 5 of the 15 CA standards, and implementation of numerous other standards have already started. Most of the ISO 20022 messages are already implemented by KDPW. Some key data elements specified in the AMI-SeCo Standards are not used today and shall be implemented. For the time being there are no use cases for some of the corporate action events listed in the AMI-SeCo Standards, therefore additional developments would be made only upon having appropriate market practice and market requests on additional event types. At the moment we propose to put those on hold and seek for market demand and endorsement, if any. KDPW will promptly inform on the outcome of market consultations planned for H12021.

It is important to highlight that implementation of some standards would require legislative change, which may be difficult to attain in the given timeframe. Furthermore, should required changes be implemented, these could only apply to new securities issues, whereas already issued securities would maintain legacy legislative requirements. Legal barriers have been identified with regards to standard 4 rounding rule no. 2 and rounding rule no. 3 as these may contradict some of the existing issues rounding models. Furthermore, debt securities are by law issued in units not nominal value, which contradicts standard 7. When it comes to CA communication in ISO20022 KDPW converts amount data in units to nominal value for debt instruments, nonetheless they are issued and safekept in units.

Should the above legislative obstacles be maintained, KDPW is open to cooperation in search of appropriate and acceptable bypass measures.

	Rounding rule no. 1	For cash payments, the cash amount to be paid is to be rounded down to the number of decimals permissible in the payment currency (i.e. to 2 decimals in case of EUR payments).Accordingly, and as an example, a cash amount of EUR 2.556 should be rounded down to EUR 2.55	Adaptation Required	Need to update the rounding rules as per standard.	No				
	Rounding rule no. 2	For securities movements, the securities amount should be rounded down to the nearest full unit.	Adaptation Required	Need to update the rounding rules as per standard.	Yes Rule contradicts some of existing securities issues. Legislative implementatio n of the rounding down rule required.

	Rounding rule no. 3	For the calculation of cash payment amounts or securities movement amounts relating to a specific securities account, the ratio applicable to the entire issue should be applied to the total holding in the parent ISIN on the securities account. (There should be no intermediate step whereby a ratio per 1,000 nominal is calculated, and then applied).	Adaptation Required	Need to update the rounding rules as per standard. For some MAND events it is required to instruct the CSD on the beneficial owner holdings, and the ratio is applied at particular holding, not the entire holding on securities account.	Yes Legislative change required.				
	Rounding rule no. 4	The ratio specified by the Issuer CSD in the event notification should be passed on in its entirety in the event notification sent by all Account Servicers and Custodians in the custody chain. (There should be no rounding up, or rounding down, or truncation, of the ratio).	Implemented	-	-
